NCRB NEWSLETTER

VOLUME-XVII ISSUE-III July-September 2026

Director NCRB, Shri Amit Garg, IPS, on the occasion of Celebrations of Independence Day 2026 in NCRB Premises.

From the Desk of the Director

It gives me immense pleasure to present the NCRB Newsletter for the Third Quarter of 2026, highlighting the Bureau's key initiatives and activities undertaken during the period from July to September 2026. Having assumed charge as Director, NCRB, on 9 July 2026, I look forward to strengthen the Bureau's role in modernizing policing and supporting an efficient, technology-driven criminal justice system.

During the quarter, NCRB continued its efforts towards the development of CCTNS 2.0/ICJS 2.0, with a focus on technological advancement, improved data integration and enhanced support for law enforcement agencies. The integration of Artificial Intelligence and Machine Learning capabilities, including FIR summarization, crime pattern detection, identity resolution and multilingual assistance for investigating officers, represents an important step towards enabling smarter and more efficient investigations. Coordination with States/UTs and partner organizations also remained a priority to facilitate the effective rollout of these initiatives.

Capacity building continued to be a significant area of focus. The Bureau conducted ten training courses, benefiting 237 participants, on subjects including cybercrime and digital forensics, CCTNS/ICJS, NAFIS, e-Prisons, e-Sakshya, e-Prosecution and e-Forensics. The continued inclusion of the New Criminal Laws and their implementation in CCTNS in training programmes reflects our commitment to ensuring that personnel remain equipped to meet emerging professional and technological requirements. The webinar on "Implementation of CCTNS 2.0" further promoted knowledge-sharing among participating States and Union Territories.

The Bureau also encouraged academic engagement through visits by interns and students from institutions of eminence, universities providing them with insights into NCRB's functions, digital platforms and contribution to criminal justice administration.

I appreciate the dedication and professionalism of NCRB officers and staff and acknowledge the valuable cooperation extended by States, Union Territories and partner agencies. I am confident that, through continued innovation, collaboration and capacity building, NCRB will further strengthen its contribution towards a more efficient, transparent and technology-enabled criminal justice system in the country.

80th Independence Day of India was celebrated by NCRB on 15 August 2026 with patriotic fervour, reaffirming its commitment to national unity, integrity and dedicated public service.

Jai Hind!

Shri Amit Garg

Director, NCRB

Success Stories of NAFIS:

Case 1: Karnataka – PS: A.P. Nagar, District: Bengaluru City

Following a burglary reported at A.P. Nagar Police Station, Bengaluru City, Karnataka, under Sections 331(4) and 305 of the Bharatiya Nyaya Sanhita (BNS), the Finger Print Expert examined the crime scene and developed a chance print. The chance print was searched through the NAFIS database and successfully matched the fingerprint record of a 28-year-old individual residing in Rajanvandi Village, Ahore Tehsil, Jalore District, Rajasthan. The identified individual was found to have a previous criminal record in Crime No. 1842/2021 under Sections 457, 461 and 380 IPC, registered in Thrissur City, Kerala. The fingerprint record was associated with NFN Nos. AP00007064 and KA00303456. The identification through NAFIS not only provided a crucial lead in the investigation but also helped identify an interstate offender, demonstrating the effectiveness of NAFIS in linking crime-scene evidence with existing criminal records across State boundaries.

Case 2: Odisha – PS: Bondamunda, District: Rourkela

Following a burglary reported at Bondamunda Police Station, Rourkela, Odisha, under Sections 331 (4) and 305 of the Bharatiya Nyaya Sanhita (BNS), the complainant reported that an unknown person had broken the window of his house and stolen gold ornaments, including a necklace, earrings, mangalsutra, chains, rings, bangles and a gold coin weighing 8 grams. The Finger Print Expert examined the crime scene and developed two chance prints and were searched through the NAFIS database, and one of them successfully matched the fingerprint record of a previously recorded offender. The identification provided a vital lead to the investigating agency and led to the identification and apprehension of the offender. The case demonstrates effectiveness of NAFIS in rapidly identifying offenders through scientific fingerprint evidence & supporting investigation of burglary.

Case 3: Andhra Pradesh – PS: CCS Tirupati, District: Tirupati

Following a burglary involving property worth approximately ₹1,15,30,756/- at Tirupati Police Station, Tirupati, Andhra Pradesh, registered as Case No. 22/2026 under Sections 331(4) and 305(a) of the Bharatiya Nyaya Sanhita (BNS), the Finger Print team conducted a detailed examination of the crime scene and developed several chance prints. The chance prints were searched through the NAFIS database and successfully matched the fingerprint record of a previously arrested offender bearing NFN No. MP00243506 and State PIN 33104830, registered with the State Finger Print Bureau, Madhya Pradesh. The identification further revealed that the offender had previously been involved in three property-related offences, including two cases in Maharashtra and one in Madhya Pradesh. The coordinated use of NAFIS and information shared by the Finger Print Bureaus of the concerned States provided a crucial scientific lead to the investigating officer and assisted in the prompt detection of the offender and resolution of the case.
